Our Mission

To create value in the lives of people through innovation and thereby develop a sense of pride for those associated with us. We have quality checks at each and every stage of the process to ensure that quality standards are maintained. Following which, our finished products are subject to stringent functionality tests.

We strive to create value for our customers through our range of products for everyone associated with us

Quality is our promise, your satisfaction is our priority.

Our Certifications

MILD STEEL HOT ROLLED TMT BARS

MS TMT Bars, or Thermo-Mechanically Treated bars, are a pinnacle in modern construction materials, renowned for their high strength, durability, and exceptional TMT steel quality. Fortran Steel is an authorized distributor of Jindal Steel & Power Ltd's exemplary steel products.

The TMT process involves a crucial phase of heating the TMT steel to a high temperature and then cooling it rapidly. This thermal treatment endows the mild steel TMT bars with a tough outer surface and a more ductile core. This dual characteristic of MS TMT Bars — hard exterior and flexible interior — is what makes MS TMT bars ideally suited for bearing heavy loads and adapting to various environmental stresses without succumbing to wear.

By utilizing cutting-edge technology and superior-grade raw materials, each mild steel TMT bar is crafted by our manufacturer to deliver performance that you can depend on. The competitive price TMT bars offer ensures that quality is accessible at a cost-effective rate, making them a preferred choice for builders and developers nationwide.

MILD STEEL HOT ROLLED TMT BARS

Applications

- Infrastructure Projects
- Residential Buildings
- Commercial Structures
- Earthquake-Prone Areas
- Urban Development
- Coastal Construction
- Reinforcement Projects
- Industrial Facilities

Grades

Fe 415	Fe 500
Fe 500D	Fe 550
Fe 550D	Fe 600
Fe 650	Fe 700
CRS	Galvanized

Sizes

8 mm to 32 mm

Tolerances

ASTM, DIN

$\pm 0.3\text{MM}$ TO $\pm 0.6\text{MM}$

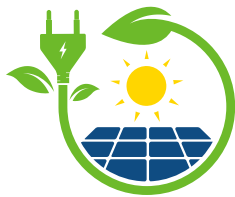

Supply Condition

- Zinc Coating • Galvanized Coating

Sustainability At Our Core

Our company's rainwater harvesting system conserves 5,000 liters of water every day. This adds up to 1.5 million liters annually, contributing to sustainable practices and reducing our environmental footprint significantly.

Our solar power system saves 1 million units of electricity annually, reducing energy costs and supporting our commitment to sustainability.

We ensure CBAM compliance by utilizing recycled steel in our processes, reflecting our commitment to sustainability and eco-friendly practices. This approach minimizes carbon emissions and aligns with global climate and regulatory goals.

We are aligning our efforts with global carbon emission goals, driving sustainable practices to create a greener, more eco-friendly future.
